

# New Series License Plates & Reserved Numbers Info

Every eight years Wyoming has new issue or a new “series” of license plates. That means the background picture and/or colors on the plate are different from the current license plates series.

2001-2008 Devil Tower Series ~~

~~2009-2016 Teton Series

Each county in the state has the option to save or hold back a sequence of numbers as “reserved”.

These designated numbers are held for the current possessor of that reserved number. Those people get first choice of keeping the same number for the new license plate series.

In Platte County your license number is “reserved” ***IF*** the number you currently have is one of the following:

Car 1 - 3500	Truck 1 - 3500	Large Trailer 1 - 1000	Small Trailer 1 - 1000	Motorcycle 1 - 200
ATV 1 - 100	Camper 1 - 200	Commercial 1 - 100	Handicap 1 - 25	

## Note:

During the changeover from the 2001 to the 2009 series, it is possible that a *non-reserved* number (i.e. passenger #3501 or truck #6750) may be registered to two different vehicles and two different owners at the same time. Both plates are legal because one is the [2001 Devil Tower Series](#)~~ and one is the new [2009 Teton Series](#).

The reserved and non-reserved plates for the new 2009 Teton series will be available January 2, 2009.

The reserved numbers will be held for the full year of 2009. Specifically Jan. 2, 2009 through Dec. 30, 2009.
